2026

Beef Sire Brochure

INTRODUCTION

We are proud to present our Bova AI Beef Sire Brochure for 2026. We are looking forward to releasing some exceptional new sires across several breeds this season. We are very excited to offer a new red & white Chocolat d'Ochamps son, Ballyart Rafa BB2634 who is out of a proven cow with top end progeny. Rafa has exceptional width and a performance packed pedigree guaranteed to produce show champions. Our Limousin sires have been boosted by new sire Clonark Ultan who we hope to have a very bright future ahead. Our Simmental lineup features 2 new additions for breeders. We have some outcross Angus sires available later this season that we are very excited about. We also have a new proven Salers sire from France who is breeding extremely well in a Cork based herd. We have some other new release sires coming on stream in the coming months, so please keep an eye on our social pages for details.

Following on from a successful 2025 beef season, the domestic commercial beef market has never been as good, due to declining European beef cow numbers. In-calf heifer sale specialists are choosing the Limousin sire Loyal, available in sexed semen, to fetch top prices. Loyal has really taken the heifer trade to a new level with top prices last season. For those looking for show quality with some colour, Ballyart Rafa, Reward, Record, Fury Sam, Derreen Jack and many more will appeal to true cattle people that want high quality calves.

With the use of beef AI on dairy herds growing annually, our beef sires suitable for the dairy herd are producing premium progeny that command top prices. Many of our bulls rank in the top 1% for Replacement, Terminal and DBI indexes within and across breed. These indexes will be updated every 2 months by ICBF, so please be aware of this when making your breeding decisions.

We constantly strive to source the very best available genetics of each breed, to provide our customers with the most suitable bulls for their market requirements. If you think you have a bull that may add to our stud, please do not hesitate to contact us.

Bova AI wish to say a huge thank you to all of our customers for their continued loyalty to our product. It is much appreciated and we hope to continue our relationship as the company evolves.

We like to see progeny from our sires, so if you have any images from progeny of our bulls, please forward to us via social media platforms or whats app and e-mail. Please ensure image quality and resolution is of a high quality to publish and choose a well lit clean background.

May we take this opportunity to wish you a very successful breeding season, and if you require advice on any bulls that we would recommend, please do not hesitate to contact us.

Royalty Scheme for Pedigree Registered Calves

Please note that some of our beef sires have been placed on the royalty scheme with their respective breed societies. This scheme allow us and you to use bulls at commercial rates and pay an extra fee when you register your pedigree calves.

SEXED SEMEN

Bova AI have continued to work with Sexing Technologies in order to supply high quality 4M sexed female & male semen from some of our top beef sires to our customers. Semen from these bulls may be limited in supply, so please contact us early to book straws from your chosen bull. We have outlined recommendations below for its use. Trials have shown that the best results with sexed semen are when used on natural heats.

Sexed Ultra 4M AI Recommendations

18-22hrs -	AI with sexed semen 18-22 hours after first signs of standing heat.
Regulate -	use temperature regulated thawing unit.
Daily -	change thawing unit water daily.
Weekly -	clean thawing unit weekly.
35-37°C -	monitor water temperature with thermometer 35-37°C.
45 sec -	thaw for approximately 45 seconds.
35-37°C -	keep semen temperature regulated to 35 to 37°C.
5 min -	use 1 straw of thawed semen per heifer within 5 minutes of initial thaw.

Semen Storage & Handling Guidelines

Handling – work below the frost line of tank. Canisters should be in the neck of the tank for no longer than 10 seconds. Use tweezers to transfer straw to thaw bath in 5 seconds or less.

Thawing – thaw semen in a controlled thaw unit at between 35°C to 37°C. Only thaw enough semen that will be used within 5 minutes. Pre-warm gun to prevent cold shock. Remove straw from thaw unit, shake and dry straw with clean paper. Do not touch straw with fingers.

Loading – load straw into gun with plug end first. Cut straw at right (90°) angle with appropriate cutters and keep straw dry and warm. Place sheath over cut end of straw and lock sheath into gun. Prime gun to remove air bubbles. Wrap loaded gun in paper towel holder to provide a thermal and hygienic protection. Place inside your clothing for transport to cow.

Insemination – follow AI recommendations for insemination.

Disclaimer: Bova AI does not carry any responsibility for, or liability to the purchaser of conventional or sexed semen in respect to loss arising from on farm fertility, which is outside of the control of Bova AI. The purchase of semen does not guarantee fertility or conception. All semen is quality controlled via the latest, internationally recognised, IMV equipment before dispatch. Please check that your semen order is correct post delivery as Bova AI are not responsible for incorrect semen used by the customer.

- Gamin is one of the highest qualified AI sires currently in France with an overall index of 123, INRA 01/25.
- Gamin is by the noted weanling specialist Edelweis MN RRE VS (IVMAT 119), who was the highest qualified bull in 2014.
- Gamin has several daughters calved and they score extremely well for pelvic width, BASpsf 116, and IVMAT 119.
- Edelweis's stamp is early muscle throughout his calves in the Mazaud herd.
- Gamin stood out for his muscling, exceptional correctness and sheer style.
- His Linear is outstanding scoring a massive 95 for muscle but he has a balanced 78 for skeletal.
- Gamin has an incredible depth of hindquarter and excellent muscling throughout.
- He displays excellent locomotion and is very strong on top.
- Gamin's pedigree is steeped in stars like EdelweisMN, Vercors, Neuf, Ionesco and Moero.
- Gamin's calves are extremely consistent, display good breed character and have a show presence.
- They have early shape, are extremely docile, correct and ooze style.
- Strongly recommended for pedigree and commercial use.
- Excellent indexes and BLUPs. DM 135, DS 113, AF 127.

Scardaune Mark heifer out of a Simmental dam

- Mark's sire Derryowen Harvey is by Roughan Echo out of a Roughan Viceroi dam.
- He is easily calved and is breeding very consistent progeny with very good breed character.
- Mark is out of an exceptional cow family which includes Nelson, Pinay, Saint Are, Grand Duc and the famous cow "Javanaise", dam of T-Urambo, who bred exceptionally well in France.
- Mark is a modern Charolais, with a clean middle, excellent length and a strong topline.
- He has a fantastic head, stands correctly and has a fabulous temperament.
- He is well muscled and should suit pedigree breeders.
- Mark's progeny are consistently well muscled with an extra rib, and show tremendous growth, style and temperament.

Insoumise - dam of Rubis (left)

Rubis heifer calf x Mark dam Damian McCauley Fermanagh

- Rubis is out of an outstanding dam "Insoumise", bred by Gaec Goujat.
- Insoumise's son, "Prince", was 1st prize at the National show in 2020.
- Rubis' grand-dam "Venise" produced the record priced bull at Cery la Tour in 2019, "Panama" selling for €15,800.
- "Ortense", great grand-dam, bred a 1st prize winner at the National show in 2020, "Rock N'Roll".
- Proven cow family guaranteed to breed milk, length, shape and style.
- Rubis' sire Laurier has produced very well in his early career with several sons sold for breeding.
- Rubis was born unassisted @ 45 kgs and weighed 400 kg's at 7 months old off his mother.
- He has excellent shape and length and carries his weight exceptionally well on his tremendous legs.
- Rubis has a fantastic head and is sure to breed well-muscled weanlings with performance to match.

Rubis' Linear;
 DM 88 DS 78 AF 82 400kgs @ 7 months.

Ballydavis News ET Reserve Junior Male Champion at Tullamore National Show 2017

Trenamullen Iona - 1st Prize Winner at National Show 2014

Crossdrum Felix 1st in his class National Show 2011

Purchased at Magny Cour Show in Sept. 2004 where he was much admired by many breeders from around the world. Has produced excellent calves in France & Ireland. Has a power packed pedigree - his dam Jacobine has produced regularly for 9 years. Jacobine is also the dam of Omnibus RVS (ISEVR 108). She is also a full sister to Liquer and a maternal sister to Galette - this being the top cow family in Jean-Marc Pacauts herd. Sylvain has the Length, Scale, Style and Muscling for the most discerning breeder. His calves in Ireland are displaying Sylvain's own best attributes - big with that extra body length so desirable today, correctness- standing on four good legs and his indisputable style. Probably by his daughters will Sylvain be rightly classed as a "breeders bull" - why wait any longer to use the natural and superior successor to Jupiter (breeder - Jean-Marc Pacaut). Sylvain sons and daughters have excelled at Irish and French National Charolais shows.

- Patent has bred well everywhere he has been used.
- Ballyart Lucky is a son of the renowned Waukaru Patent 8161.
- He stamps his progeny like himself, well muscled, with good heads and length.
- His females are long, with good growth, excellent pelvic area and style, while his bulls are masculine and well grown.
- Lucky is very well muscled, long and clean bodied.
- He has an exceptionally strong topline and good feet and legs.
- He has excellent performance since birth and has an unbelievable temperament.
- He should suit breeders looking to improve muscling and milk.
- Best used on large framed cows that require extra width.
- Lucky is breeding very well both commercially and pedigree.
- Top percentage of breed for carcass weight and conformation.
- Top percentage of breed for gestation, carcass weight and conformation.
